

Introduction to Bearings

The aim of this introductory course is to provide learners with the basic knowledge required to identify and explain the purpose and operation of different types of bearings, and the skills to perform condition monitoring on bearings.

- ✓ INTRODUCTION TO BEARINGS
- ✓ IDENTIFICATION OF BEARINGS
- ✓ CONDITION MONITORING OF BEARINGS

At the end of this course learners will be able to:

- Understand what bearings are
- Understand how bearings are constructed
- Identify different types of bearings
- Identify bearing bush materials
- Understand the common causes of bearing failure
- Perform condition monitoring on bearings
