

Performing Routine Maintenance

The aim of this course is to provide learners with the ability and skills to perform routine maintenance on moulding machines to ensure operational efficiency. This course introduces learners to the importance of lubrication and will equip the learner to clean and lubricate machines.

- ✓ MAINTENANCE AND LUBRICATION
- ✓ WORKING SAFELY WHEN LUBRICATING
- ✓ PREPARE AND CARE FOR LUBRICATION TOOLS
- ✓ USING LUBRICATION TOOLS
- ✓ OVERALL MACHINE MAINTENANCE

At the end of this course learners will be able to:

- Understand the definition and principles of routine maintenance
- Know the value of preventative maintenance
- Plan and prepare for routine maintenance
- Use maintenance schedules
- Perform maintenance and repairs
- Complete checklists after performing maintenance and repairs
